

## PTC WebShip®

# Manifest Solution for Parcel and Less-Than-Truckload (LTL)

## WebShip Version 8.4 has been released!

PTC WebShip is a web-enabled solution that manages all aspects of the shipping process for small parcel and less-than-truckload (LTL) carriers.

Providing a single-point interface to manage Rating, Shipping, Bundling, and Close Out processes across the enterprise, helping you make the best shipping decisions for your business. The application optimizes shipping through rate shopping, an automated manifesting process that reduces cost and enhances tracking and traceability.

WebShip 8.4 is available to download using the following option:

- Download the latest WebShip Manifesting solution from PTC Software Download-> Warehouse Management Solution under the [PTC eSupport Portal](#)

## Highlights of WebShip 8.4

- **UPS Word Ease - International Shipments** helps you ship packages to multiple recipients within a country or the European Union (EU) as one shipment that clears customs as a single transaction.
- **FedEx Meter Number Verifications**, now you can verify your FedEx configuration before starting to ship your products. This verification will eliminate errors during FedEx shipment
- **FedEx Billing Consignee Issue**, resolve the issue of sending the recipient's FedEx account number for Duty Tax Payer for Canada Shipments instead of the shipper's account number
