

ThingWorx Solution Central

ThingWorx Solution Central is a centralized portal in the cloud that allows global and site system administrators to efficiently discover, deploy, and manage ThingWorx applications across the enterprise, from a single location. It offers the scalability to seamlessly deploy to one or multiple sites, and provides enterprise-wide visibility to foster maximum productivity.

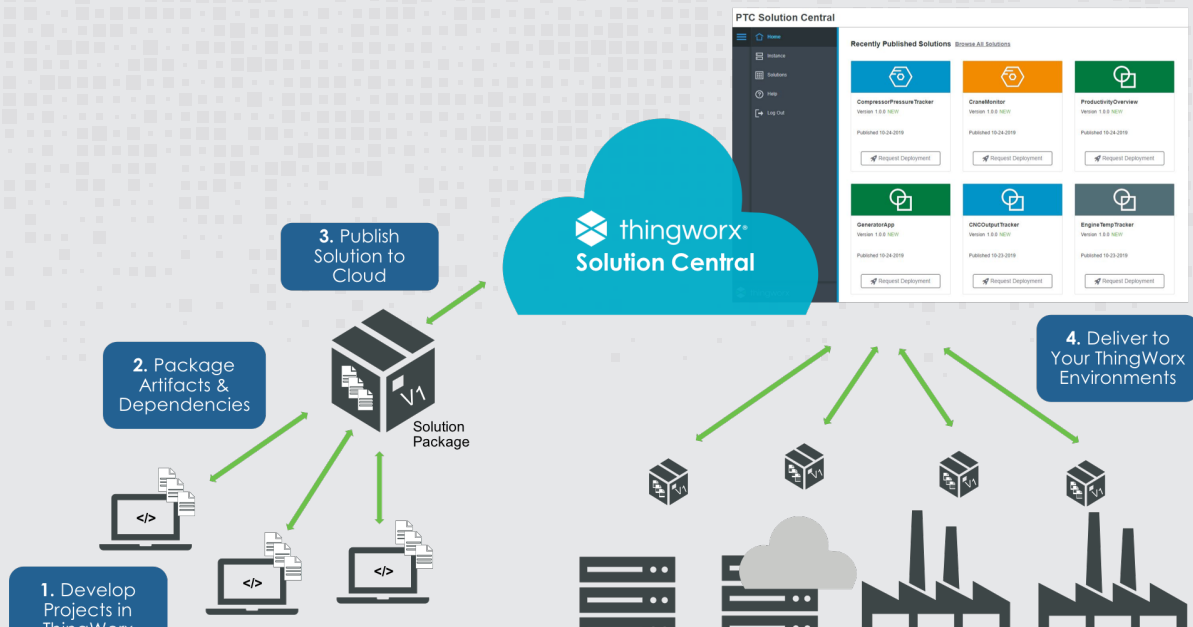

ThingWorx Solution Central Accelerates Deployment and Enables DevOps via:

- Administration tools for deployment from a central cloud portal
- Packaging of projects, extensions, entities, and solutions
- Automated dependency management through project and entity links
- Simple, intuitive, UI-based environment for solution management
- Automation-ready APIs for continuous integration and delivery pipelines
- Standardized artifacts, versioning, and storage to simplify integration into existing environment
- Tenancy in the Solution Central cloud to provide customers their own exclusive repository

How It Works

A cloud-hosted service, ThingWorx Solution Central plays a pivotal role in the software development lifecycle by accelerating deployments and simplifying management of ThingWorx applications and their associated dependencies in any environment, across the enterprise.

Accelerated Solution Deployment

ThingWorx Solution Central eliminates manual deployments and dependency management to more rapidly deploy and accelerate ThingWorx technology and solutions throughout the enterprise.

- Automatic identification of dependencies for ThingWorx applications
- Detection and alerts of unassigned entities not yet included in a project
- Dependencies are packaged and pushed to a central cloud repository
- Packages can be deployed to any ThingWorx instance in any location, on premise or in the cloud

Efficient DevOps

With ThingWorx Solution Central, administrators automate and manage deployments of any size and scale with speed and repeatability.

- Deployments to a single environment are executed using simple, intuitive user interface
- Automated, large-scale deployments publish to multiple environments
- Artifacts are standardized and integrate with third-party DevOps tools already in use
- All ThingWorx applications can be backed up in a central repository

About PTC (NASDAQ: PTC)

PTC unleashes industrial innovation with award-winning, market-proven solutions that enable companies to differentiate their products and services, improve operational excellence, and increase workforce productivity. With PTC, and its partner ecosystem, manufacturers can capitalize on the promise of today's new technology to drive digital transformation.
