KEPWARE ENTERPRISE LICENSING

Learn Why Standardizing Your Connectivity Really Adds Up

ptc®

DIGITAL TRANSFORMS PHYSICAL

ACCESS ADDITIONAL FUNCTIONALITY AT GREAT VALUE

Kepware enterprise packages bundle together the elements that customers appreciate most at unprecedented value. These packages offer you access to the latest functionality and drivers that are most relevant and needed for you to successfully run your business.

An Enterprise connectivity strategy can drastically increase your scalability and your time to value.

BRING YOUR SOFTWARE ROI TO A NEW LEVEL

As a valued PTC customer you have always received seamless upgrades, ongoing maintenance, and security updates through your support contract. By converting or upgrading your existing licenses to enterprise packages, you will get so much more. Explore renewal options at **https://www.ptc.com/en/customer-success/renewals.**

1. **Minimize IT and Administrative burden, using a single license across your enterprise**, You will have the flexibility to scale and deploy anywhere within your organization, through a singular activation key and easily track total usage across your entire enterprise footprint.

2. **Enjoy access to regular updates to ensure connectivity remains current and secure** without any additional support and maintenance contracts. Enterprise licensing ensures all of your servers are eligible for the latest security enhancements.

3. **Realize the cost-effective benefits for your entire installation** with licensing that can be scaled up or down as needed to meet changing requirements. Optimized cost-to-value and predictable budgeting make for an easier purchase approval process.

4. **Maximize value and future-proof your connectivity.** We recognize that your business has likely evolved and so have your software needs. You have access to all Kepware capabilities to capture major savings with rates compared to standard software list prices.

5. **Simplify the management of your contracts** by aligning your license anniversary date to only manage one annual renewal. You will also gain the flexibility to adjust licenses to match changing business needs while enjoying multi-year price protection by securing contract durations of up to three (3) years.

EVEN MORE VALUE

For connected enterprises that need a single interface across their industrial automation landscape, **Kepware+** is the management tool that offers a single, simple, modern configuration experience.

1. INCREASE YOUR VISIBILITY

Kepware+ is the single pane of glass for all Kepware server deployments. Remotely view and configure installations across the enterprise from a single access point.

2. INCREASE YOUR EFFICIENCY

Spend less time validating software and integrations and more time creating value. Avoid unnecessarily complex data for better data-driven decisions.

3. INCREASE YOUR SAVINGS

Waiting for on-premise access or expertise can be costly. Save work hours with SaaS-based capabilities for key workflows, ensuring that optimization happens from any location, 24/7.

4. INCREASE YOUR SECURITY

Mitigate remote security challenges with established infrastructure and edge agent technology, enabling secure access anywhere without added risk.
