Self-Guided Classes FAQ

What is a Self-Guided class?

A Self-Guided class is an alternative option to our instructor-led classes. Students may complete the class materials and lab exercises on their own without live instruction from a PTC University instructor.

Why are Self-Guided classes scheduled?

At this time, we are scheduling all Self-Guided classes to securely manage our VM capacity. You will have 3 hours to complete the class as you would with an instructor-led class.

What materials are included in a Self-Guided class?

Just as with our instructor-led courses, you receive a student guide that contains the class content and walks you through the lab exercises. You will also get access to a VM training computer that you will use to access the lab files required to complete the exercises.

What if I need assistance during my class?

For curriculum questions, please visit PTC University's [community page](.).

For technical issues or questions, please reach out to trainingcentral@ptc.com. Please note, that if you are experiencing a technical issue, we will do our best to troubleshoot within your remaining class time.

For additional supporting documents, please visit PTC University's [training support page](.).

Self-Guided Classes FAQ

Which classes currently offer a Self-Guided sessions?

We currently offer the following classes as a Self-Guided option:

- Creo: Fundamentals of Modeling 1

- Creo: Fundamentals of Modeling 2

- Creo: Fundamentals of Assembly

- Creo: Fundamentals of 2D Drawing

- Creo: Fundamentals of Analysis

These classes are only available with English language materials.

How can I find and enroll in a Self-guided class?

Navigate to Learning Connector's Find a Class page and filter by "Self-Guided". Once selected, you can review the list of upcoming sessions and enroll in a class that works best for your schedule.
