OPC UA GATEWAY POWERED BY KEPWARE+

Delivering the quality, and interoperability
that OT organizations need, and IT organizations demand.

**Kepware+'s OPC UA Gateway** introduces expanded capabilities for tunneling and structured data translation, namespace aggregation, and federated browsing to consolidate OPC UA connectivity throughout the enterprise.

WHAT THAT MEANS FOR YOU

» **MANY TO MANY ARCHITECTURE** For broader, secure connectivity across legacy and modern systems

» **NAMESPACE AGGREGATION** Enables seamless data access throughout the organization

» **FEDERATED BROWSING** For security and an improved user experience

» **BROWSE THROUGH** To save time accessing data from different sources

THE VALUE YOU CAN EXPECT

TIME SAVINGS

With a UA Gateway, strategic enterprise connectivity is now a reality. Users are able to move between servers in a much more streamlined way. Federated browsing ensures security and, what used to take dozens of clicks can now be accomplished with only a few, saving time to data access. Because of its high level of functionality, Kepware+'s UA Gateway advances adoption.

RICHER DATA CONFIGURATION

The UA Gateway is exclusively configured on Kepware+ - the ease of SaaS and built on PTC's powerful Atlas platform – reducing time to configure. With a high level of security, the UA Gateway bridges OT and IT data and provides data translation, allowing distributed systems to work together. Kepware+'s solution provides a single point for managing access to all industrial data, not just OPC UA in the organization, increasing data access across the enterprise.

MODERNIZATION & EXPANSION

Kepware+'s UA Gateway will expand our current OPC UA, including structured data features, remote procedure call methods, and improved alarms and conditions, all with faster configurations to enable upstream data access. With support for the OPC companion specifications, Kepware+'s UA Gateway enables interoperability even at the text level. The UA Gateway enables 'upgrading' communications seamless.

ENCHANCE SECURITY

The UA Gateway is exclusively available with Kepware+, and is quickly and easily configured using the SaaS capabilities. Kepware+'s UA Gateway provides a high level of enhanced security of an industrial operations network with improved encryption technologies. Combined with Kepware+'s enterprise management capabilities, managing security and access just got easier.

BREAKING DOWN THE BARRIERS

Introducing Kepware+, PTC's enterprise industrial connectivity solution that enables seamless, secure access to OT data across IT and OT systems. Kepware+ brings together best in class OT connectivity with modern capabilities to help you remotely monitor and manage your industrial connectivity at scale.
