

HPE Edgeline, ThingWorx and Vuforia

Working together. Accelerating results.

A new Style of Partnering

Hewlett Packard Enterprise and PTC are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, PTC is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

PTC has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

Product Overviews

ThingWorx is the industry leading Industrial Innovation Platform from PTC that includes technologies and tools that enable you to rapidly develop, deploy and extend applications designed to drive digital transformation. ThingWorx contains a broad set of features, including a variety of connectivity options, application development tools and analytics, all built around a single, real-time view of a physical object in the digital world - the Thing Model. The platform eliminates complex connectivity, programming and deployment tasks for developers while delivering powerful end user solutions that deliver high levels of return on investment. Vuforia is a powerful and flexible industrial augmented reality platform designed to visually connect humans with the digital/physical world. Vuforia enables all phases of the AR journey, across incubation, optimization and scale, and can be enhanced with real-time data and proactive insights through the ThingWorx platform. Using ThingWorx and Vuforia, you can quickly take your business to a new level by building smart, connected products, operations, and software. HPE and PTC provide pre-integrated end-to-end solutions for Industrial IoT Use-Cases based on market leading portfolios around HPE Intelligent Edge Solutions and the ThingWorx and Vuforia platforms. HPE and PTC bring together a specific set of products, advisory, integration, and runtime services, enabling deployments with minimum risk and cost.

HPE Edgeline: HPE Edgeline Converged Edge Systems enable true edge computing. In a single enclosure, they provide unprecedented high-performance compute, precision data capture and control systems, data center-class security, and Integrated Lights Out (iLO) systems management. These industrial-grade network edge devices are hardened for Internet of Things (IoT) edge environments and can operate in virtually any environment to deliver secure, uninterrupted connectivity. Upgradability and I/O options provide a strong foundation for your future IoT plans, enabling you to expand your IoT infrastructure beyond the confines of traditional data center and avoid vendor lock-in. Edgeline Converged Edge Systems:

- Provides legacy manufacturing integration for predictive maintenance
- Delivers real time analysis and condition monitoring
- Allows real time monitoring and control
- Expedites Data management and video analytics
- Helps in asset monitoring and management
- Enables the Intelligent edge workspace

Company Overview

About PTC

PTC is a global software company that delivers an industrial innovation platform and field-proven solutions and services to help companies design, manufacture, operate, and service things for a smart, connected world.

Since 1985, PTC has been enabling customers to stay one step ahead of the competition by combining our strategic vision with leading, field proven technology. PTC technology helps companies to quickly unlock the value now being created at the convergence of the physical and digital worlds through the IoT, AR, 3D Printing, Digital Twin, and Industrie 4.0. With PTC, global manufacturers and an ecosystem of partners and developers can capitalize on this promise of physical digital convergence today and drive the future of innovation.

About Hewlett Packard Enterprise

Hewlett Packard Enterprise is an industry-leading technology company that enables customers to go further, faster. With the industry's most comprehensive portfolio, spanning the cloud to the data center to workplace applications, our technology and services help customers around the world make IT more efficient, more productive, and more secure.
